ELPA21 Interactive Demo Access Instructions

This document provides directions for accessing the ELPA21 Interactive Demos.

It is strongly encouraged that all students participating in the ELPA21 Assessment take the Interactive Demos to practice and familiarize themselves with the online testing platform in advance of the operational test. Because the Demos are essentially a practice opportunity for the students, their answers will not be saved. Interactive Demos do not contain secure content; they may be viewed outside of a secure environment.

Prior to administering the Interactive Demos, there are three steps you should take:

1. View the Student Testing Session training module
2. Review the Interactive Demo Lesson Plans (available by grade band)
3. Using a Chrome Browser, navigate to

All of the supporting documentation necessary for steps 1, 2, and 3 are located http://wvde.state.wv.us/federal-programs/ELPA.htm and https://wv-elpa.nextera.questarai.com/admin/ (after 1/21).

Interactive Demos

The Interactive Demos are available each grade band, and there is a long and short form demo for K. Kindergarten students who are less familiar with online testing should be administered the long version.

The Interactive Demo offers online supports for students who require designated supports or accommodations in the testing environment. ELPA21 offers Interactive Demos that will allow students to practice using the unique tools that will be available to them during the ELPA21 Test (General Masking and Initial Page Zoom are not available within the Interactive Demos). Please note that on test day students will not be able to select their own designated supports or accommodations. Any designated supports or accommodations needed for test day are pre-selected by a teacher or administrator per the student's IEP or 504 plan.
Accessing the Interactive Demos

1. Using a Chrome Browser, navigate to:

2. This **Sign-In** screen should appear:

   ![Sign-In Screen](image)

3. Select the appropriate grade from the drop-down menu.

4. Enter a name in the “Enter your name” box. Click the “Start Test” button.
5. If a student needs an online designated support or accommodation, click the icon next to the specific support or accommodation. The selected support or accommodation will turn blue. Once completed, click the “Continue” button.

6. The directions will appear.

The Interactive Demo Lesson Plans should be used to prepare students for the operational administration.
