CONTACT: Patricia Carideo – Accounting/Invoicing

EMAIL: pcarideo@lexile.com

PHONE: 919-547-3405

FAX: (919) 547-3401

ADDRESS: 1000 Park Forty Plaza Drive, Suite 120
Durham, North Carolina, 27713

CODES:

- EM** Emerging Mathematician
- NMQ** Not Measurable in Quantiles
- HMC** Higher Mathematical Concept

John,

Attached is the report for the WV Geometry text you submitted for Quantile Calibrations. I have included the contact information for our group here. If you have any questions regarding the meaning of the measures please contact me. Any questions pertaining to the agreement or future work requests can go to Kanista. Patricia will handle the invoicing.

Thanks and talk to you soon,
Bridgett

Grade Geometry

1 An Informal Introduction to Geometry

1.1	Picturing and Drawing - Getting Started	580Q
1.2	Drawing 3-D Objects	530Q
1.3	Drawing and Describing Shapes	880Q
1.4	Drawing From a Recipe - Reading and Writing Directions and Drawings	NMQ
1.5	Constructing - Getting Started	1070Q
1.6	Compasses, Angles, and Circles	NMQ
1.7	Geometry Software - Getting Started	NMQ
1.8	Drawing vs. Constructions	NMQ
1.9	Drawing UnMessUpable Figures - Building Constructions	NMQ
1.10	Invariants - Properties and Values That Don't Change - Getting Started	800Q
1.11	Numerical Invariants in Geometry	NMQ
1.12	Spatial Invariants - Shape, Concurrence, and Collinearity	1070Q

2 Congruence and Proof

2.1	The Congruence Relationship - Getting Started	770Q
2.2	Length, Measure, and Congruence	770Q
2.3	Corresponding Parts	770Q
2.4	Triangle Congruence	1190Q
2.5	Proof and Parallel Lines - Getting Started	1220Q
2.6	Deduction and Proof	1160Q
2.7	Parallel Lines	1250Q
2.8	The Parallel Postulate	1250Q
2.9	Writing Proofs - Getting Started	NMQ
2.10	What Does a Proof Look Like?	1190Q
2.11	Analyzing the Statement to Prove	1100Q
2.12	Analysis of a Proof - Understanding or Writing: Which Comes First?	1190Q
2.13	The Reverse List - Working Back From What You Want to Prove	1190Q
2.14	Practicing Your Proof - Writing Skills	1170Q
2.15	Quadrilaterals and Their Properties - Getting Started	680Q
2.16	General Quadrilaterals	1000Q
2.17	Properties of Quadrilaterals	1120Q
2.18	Parallelograms	1120Q
2.19	Classifying Parallelograms	1120Q

3 Dissections and Area

3.1	Cut and Rearrange - Getting Started	680Q
3.2	Do the Cuts Really Work? Using Properties of the Shapes Being Cut	1120Q
3.3	Cutting Algorithms - Ways to Rearrange Into Rectangles	1280Q
3.4	Checking an Algorithm - Justifying the Cuts	1280Q
3.5	The Midline Theorem	1280Q
3.6	Area Formulas - Getting Started	450Q
3.7	What Is Area, Anyway?	1010Q
3.8	Area by Dissection - Parallelograms, Triangles, and Trapezoids	1010Q
3.9	Proof by Dissection - Getting Started	1010Q
3.10	The Pythagorean Theorem	1050Q
3.11	Pick a Proof - Other Proofs of the Pythagorean Theorem	1050Q
3.12	Measuring Solids - Getting Started	1040Q
3.13	Surface Area: Prisms and Pyramids	1220Q
3.14	Surface Area: Cylinders and Cones	1220Q
3.15	Volumes of Solids	1070Q

4 Similarity

4.1 Scaled Copies - Getting Started	1000Q
4.2 Scale Factors	1000Q
4.3 What Is a Well-Scaled Drawing?	990Q
4.4 Testing for Scale	1040Q
4.5 Checking for Scaled Copies	1040Q
4.6 Curved or Straight? Just Dilate! - Getting Started	1230Q
4.7 Making Scaled Copies	1120Q
4.8 Ratio and Parallel Methods	1120Q
4.9 The Side-Splitter Theorems - Getting Started	NMQ
4.10 Nested Triangles - One Triangle Inside Another	1170Q
4.11 Proving the Side-Splitter Theorems	1280Q
4.12 The Side-Splitter Theorems (continued)	1280Q
4.13 Defining Similarity - Getting Started	990Q
4.14 Similar Figures	1040Q
4.15 Tests for Similar Triangles	1170Q
4.16 Areas of Similar Polygons	1230Q

5 Circles

5.1 Area and Circumference - Getting Started	NMQ
5.2 Area and Perimeter	NMQ
5.3 Connecting Area, Circumference	1280Q
5.4 Circles and 3.14 - Getting Started	1040Q
5.5 An Area Formula for Circles	1150Q
5.6 Circumference	1150Q
5.7 Classical Results About Circles - Getting Started	900Q
5.8 Arcs and Central Angles	1210Q
5.9 Chords and Inscribed Angles	1210Q
5.10 Secants and Tangents	1230Q
5.11 Power of a Point	1250Q
5.12 Geometric Probability - Getting Started	1230Q
5.13 Probability as a Ratio of Areas - Monte Carlo Method	1230Q
5.14 Sets of Measure 0 - Probability When an Area is 0	1230Q

6 Using Similarity

6.1	Some Uses of Similarity - Getting Started	950Q
6.2	An Inequality of Means	1250Q
6.3	Similarity in Ancient Greece	1210Q
6.4	Concurrence of Medians	1070Q
6.5	Exploring Right Triangles - Getting Started	1220Q
6.6	Some Special Triangles	1150Q
6.7	Some Special Triangles	1220Q
6.8	Finding Triangle Areas	1360Q
6.9	Extending the Pythagorean Theorem	1360Q
6.10	Volume Formulas - Getting Started	880Q
6.11	Cavalieri's Principle	1070Q
6.12	Proving Volume Formulas	1220Q
6.13	Volume of a Sphere	1220Q

7 Coordinates and Vectors

7.1	Transformations - Getting Started	1120Q
7.2	Reflections	1120Q
7.3	Translations	1120Q
7.4	Rotations	1120Q
7.5	Geometry in the Coordinate Plane - Getting Started	1240Q
7.6	Midpoint and Distance Formulas	900Q
7.7	Parallel Lines and Collinear Points	1110Q
7.8	Perpendicular Lines	1110Q
7.9	Coordinates in Three Dimensions	1240Q
7.10	Connections to Algebra - Getting Started	1120Q
7.11	Introduction to Vectors	1400Q
7.12	The Vector Equation of a Line	1400Q
7.13	Using the Vector Equation of a Line	1400Q

8 Optimization

8.1	Making the Least of a Situation - Getting Started	900Q
8.2	Finding the Shortest Path	1040Q
8.3	Reflecting to Find Shortest Paths	1040Q
8.4	Making the Most of a Situation - Getting Started	NMQ
8.5	Maximizing Areas, Part 1	1090Q
8.6	Maximizing Areas, Part 2	1280Q
8.7	Contour Lines - Getting Started	NMQ
8.8	Drawing Contour Plots	NMQ
8.9	Contour Lines and Functions	NMQ
8.10	Revisiting the Burning Tent - "Finding the Shortest Path" Using Contour	1400Q
8.11	Advanced Optimization - Getting Started	NMQ
8.12	Reasoning by Continuity	NMQ
8.13	Proving Rich's Function Is Constant - Sum of Distances to Sides of a Tr	1170Q
8.14	The Isoperimetric Problem - The Greatest Area for a Constant Perimete	NMQ
8.15	The Question of Existence - Is There a Solution for the Isoperimetric Pr	NMQ
8.16	Solving the Isoperimetric Problem	NMQ
