Ski*Hi Preschool Program

The Ski*Hi Program is a home-based preschool/parent education program for deaf and hard of hearing children.

The goal of Ski*Hi is to use a child's natural environment to improve and increase the child's language and communications skills. The program also focuses on developing and improving auditory and speech skills.

A Parent Advisor will make one weekly hour long visit to the home. During this time, the Advisor will help parents develop an understanding of their child's hearing loss and acquire skills to assist their child in reaching his full potential.
